2019

2020 Conference Announcement

5th edition of international conference on polymer science and technology

ADITYA AGGARWAL

Post Graduate Institute of Medical Education and Research, Chandigarh -160012, India

Address for correspondence:

Dr. Aditya Aggarwal, Post Graduate Institute of Medical Education and Research, Chandigarh -160012, India

adityadocpgi@gmail.com

Conference Series LLC Ltd. sincerely thanks to our wonderful Speakers, Conference Attendees and Collaborators, **Euro Polymer Science 2019 Conference** was our best ever! **5th Edition of International Conference on Polymer Science and Technology** hosted by Conference Series LLC Ltd. was held during July 30-31, 2019 at Amsterdam, Netherlands with the theme “Accelerating the trending Polymer Innovations for solving Societal Challenges” which got impressive response. With the support and guidance of Organizing Committee Members and Editorial Board Members in the fields of Polymer Science and astonishing presentations of all participants this prominent event became more impressive.

Conference Series LLC Ltd. presenting 6th Edition of International Conference on Polymer Science and Technology (Euro Polymer Science 2020) which showcase the analysis and advancements, in conjunction with conversing new applications and technologies in Polymer Science. **Euro Polymer Science 2020** is to provide a prospect for leading scientists, academicians, industry and researchers professionals from around the world to the network and have mutual scientific discussion on the latest

advancements in the interlinked domains of science, technology and business.

The major sessions of the 2020 conference includes **Polymer Marketing**, Industrial aspects of Polymers, Polymer Recycling, Polymers for Drug Delivery, Nanomaterial & Nanotechnology, Polymer +3D Printing, Polymer Rheology, Polymers for energy applications, Biodegradable polymers, Biopolymers, Commercial Application of Biopolymers Polymer Degradation & Stabilization, Polymer Applications, Renewable resources & Bio based polymers, Polymer Manufacture, New synthetic ways & advances in catalysis.

The global Polymer Science market (2016-2021) is estimated to succeed in **USD 171.96 Billion by 2021** at a CAGR of 8.5%. One point three million tones plastic product are used for Austrian consumption. This consumption is distributed over 10 consumption sectors, of that packaging (24%), non-plastic product (20%), building and construction (18%), et al., and (13%) are the foremost important ones. The global high-performance polymers market is poised to grow at a CAGR of around six, 5% within the next three years to succeed in roughly \$8.8 billion by 2020.

Polymer science field of fabric has helped in advancement in numerous fields of science and technology. The compound business has significantly developed and larger than the copper, steel, Al and a few different industries combined. Each natural and artificial polymers square measure remarkably concerned in comfort and facilitation of human life and square measure liable for life itself, for medication, nutrition, communication, transportation, irrigation, container, clothing, recording history, buildings, highways, etc. In fact, it's difficult to imagine human society without artificial and natural polymers. In our ever-increasing technological world, science plays a vital role in providing solutions to vital issues of air, clean, and rich water, food, energy, and health. The attention of polymers and connected texts give each the statistics and insights of their higher understanding in our life.

The Conference Series LLC Ltd Polymer Science and Technology Conferences embrace research, academic professors, industrial chemists, scholars who endeavor to disseminate their research experience to escalate the forthcoming research ideas. Conference Series Ltd. organizes **1000+ Global Events** every year across **USA, Europe & Asia** with support from 1000 more scientific societies and Publishes **700+ Open Access Journals** which contains over 100000 reputed scientists eminent personalities, as Editorial Board and Organizing Committee Members.
